Professional Summary

Backend-focused developer with nearly three years of experience in business and e-commerce applications. Works with Python, Django, PostgreSQL, Go and REST APIs, covering data modeling, integration, testing and debugging. Built an AI-assisted documentation prototype with model integration and human review gates.

Technical Skills

Backend: Python, Django, Django REST Framework, Go, REST APIs

Databases: PostgreSQL, SQLite, MySQL, SQL, data modeling and migrations

Tools and quality: Git/GitHub, Docker, pytest, API testing and debugging

Additional: React, React Native, JavaScript, TypeScript, HTML/CSS, WordPress; LLM APIs, Pandas, scikit-learn, Jupyter

Familiar with: Flask/FastAPI, Node.js/Express, NoSQL concepts and web deployment workflows

Professional Experience

Software Developer | SkilledHQ

Accra, Ghana | October 2023 - Present

- Contributed to Django e-commerce APIs for product data, authentication and orders, collaborating with frontend developers and stakeholders.
- Developed Go/PostgreSQL modules for payroll, invoices and payments, including organization-scoped permissions.
- Worked on database models, migrations, request validation and API integrations; built backend logic for a salon appointment-booking application.
- Wrote backend tests, investigated application issues, and contributed to dashboard endpoints and logging with Grafana Loki and Promtail.

Mobile Money Agent | Samuel Lartey Susu Enterprise

Accra, Ghana | September 2021 - July 2023

- Managed daily cash transactions, deposits and withdrawals, maintaining accurate financial records and reconciliation.
- Assisted customers with mobile financial services and issue resolution while following security and fraud-prevention procedures.
- Built customer relationships through reliable service and support.

Cosmetics Store Manager | Des Cosmetics

Accra, Ghana | January 2021 - August 2021

- Supervised daily store operations, staff activities, inventory and product restocking.
- Helped customers select products and provided recommendations and sales support.

Vocational Teacher | Cradle of Grace Montessori

Accra, Ghana | September 2019 - December 2020

- Taught Science to primary school students, prepared lesson plans and conducted assessments.
- Used practical examples and classroom activities to support student understanding.

Selected Projects

ReferralGuard

Python, Django REST Framework, React, SQLite | [View repository](#)

- Built a hackathon prototype combining deterministic checks, model-assisted extraction and human review gates for maternity referral documentation. Used synthetic facility data; not for clinical use.
- Implemented workflow and administration features, evaluation tooling and setup documentation; fixed CSRF and referral-state handling issues.

Student Performance Prediction

Python, Django, Machine Learning | Academic prototype

- Built a Django backend and API layer; prepared datasets, trained and evaluated a prediction model in Jupyter, and integrated it with a web interface.

Titanic Data Science Study

Python, Pandas, scikit-learn, Jupyter | [View repository](#)

- Cleaned and explored passenger data, trained a logistic regression baseline, and evaluated predictions using a confusion matrix and classification report.

E-commerce Platform

Python, Django | Team project

- Contributed to product catalog and authentication functionality, order-management APIs, product uploads and store creation workflows.

Hair Salon Appointment Booking

- Built backend logic and data persistence for a client-facing appointment-scheduling application.

Campus Navigation App

React Native

- Built a mobile application to help students locate classrooms, campus blocks and car parks, with search and wayfinding features.

Nonprofit Organization Website

WordPress

- Worked on theme customization, content structure and performance tuning for an NGO website.

Education

BSc Computer Science

Accra Technical University | Expected 2027

Higher National Diploma in Computer Science

Accra Technical University | January 2023 - December 2025

Languages and Additional Skills

English: Proficient. Technical teaching, client communication, graphic design and video editing.
